

On behalf of myself and the City of Winston Salem I would like to recommend Municipal Sales, Inc of Queensbury, NY for their efforts in providing chemical root control services for our '07-'08 Service Contract.

Their staff was highly trained and very respectful to the City and our residents. Their application method and equipment was state of the art.

Their product did not interfere with any of our Wastewater Treatment Plants and there was no interruption of services.

Municipal Sales finished 100% of our project including our difficult outfall lines. The contract that they were awarded last year was a 4-year renewable contract. We intend on renewing that contract this year and, hopefully, all four years.

We would gladly award future work to Municipal Sales, Inc.
